19% ahead

# Sharp decline at Union Carbide

## in third quarter

### By Our Own Correspo

IN LINE with the generally ligher carnings being reported

by the major U.S. commarciel BankAmprica, the banks.

nation's largest banking company, has reported a 19 per cent. rise in third quarter operating earnings.

Net income rose from \$93.1m. to \$110.4m. (76 cents a share) before allowing for securities transactions. The company said that a common stock issue for 7m. shares lawered net income by three cents 2 abare.

Mr. A. W. Clausen, president and chief executive, said the increase reflected higher interest revenue and revenue from non-interest carning operations, and also from a reduction in loao toss provisions, Higher personnel costs, other non-interest expects end taxes partially offset these gains, be added.

Net Interest revenue re-ported rose by 13.4 per ceot. In the quarter, and non-interes revenue from such operations aa trust department fees and business fees rose 11 per cent. The loan toss provision for the third quarter was reduced from \$35.2m. a year ago to \$21.4m.

# rench Banking

The gloom which has hung over the French banking system in the shape of the Government's austerity measures and the Left-wing threat of outright nationalisation seems to be lifting. The Socialists and Communists are at variance over their common programme, and there are some signs of economic recovery.

beer, but in a country used to low personal direct taxation it aroused fierce antagonism.)

### Burden

Nor does the burden of taxation on the corporate sector look like becoming lighter. The banking sector in particular feels itself hard done by because of the provision in the 1978 budget law to levy a special 13 per cont. surcharge on bank and insurance company charges. The budget project also improves the tax allowance on share income from Frs.2,000 to Frs.3,000 to bring it into line with that applying to fixed interest reveoue, and ollows companles to revalue their amortisable as well as non-amortisable. assets, though the gains thereby

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | # Sir Richard **Dobson's job** threatened

BY TERRY DODSWORTH, MOTOR INDUSTRY CORRESPONDENT

THE FUTURE of Sir Richard Dobson as chairman of British Leyland was under serious chal-leoge last night followiog the publication of a speech in London last mooth in which he made remarks about "wogs" at a private huainessmeo's dinner.

The speech, secretly recorded and smuggled out to the Socialist Challenge newspaper. caused a furore within British Leyland aod, the National Enterprise Board, the company's major shareholder, yesterday.

shareholder, yesterday. Left-wing MPs will be taking np the matter with the Govern-ment immediately Parliament re-assembles next week, and the Denartmeot of Industry was last oight considering a reply to a letter from Mr. Tom Litterick, Labour MP for Sellv Oak Birm-ischem demanding Sin Biohard. iogham, demanding Sir Richard's dismissal

An attempt by Sir Ricbard to An attempt by Sh Ricold to defuse the issue seemed to have failed last night. He said in a comment issued through the British Leylaod press office, hefore he left on a visit to the U.S. that he very much regretted that is contain programs made off

U.S. that he very much regretted that "certain remarks made off the cuff at a private gathering may have caused offeoce when taken out of context." In spite of this apology, Mr. Eric Varley, the Iodustry Secre-tary, is understood to be deeply concerned at the general tooe of Britain's largest State-owned
